Presidents Message

Dear Members of the Medical Dermatology Society,

On behalf of our Board and as President of our organization, I would like to take this opportunity to remind you of the ever-increasing importance of our society in the current environment. Dermatology is a diverse and fragmented specialty that encompasses a wide range of subspecialties, including cosmetic and surgical dermatology, as well as general and complex medical dermatology. This wide range of subspecialties requires dermatologists to meet the needs of various stakeholders, including our patients, trainees, and other healthcare providers. The Medical Dermatology Society is best suited to meet the needs of the medical dermatology community and patients, as it focuses specifically on the complex medical aspects of our specialty. Our society supports the ideals of medical dermatology and is dedicated to its educational and research missions. We aim to support the future of medical dermatology by providing training opportunities for trainees, and we recognize the importance of our membership as key educators, early adopters of new therapeutics, and innovators in complex medical dermatology conditions.

This year’s annual meeting showcases an exceptional lineup of speakers, topics, and content that aligns with the Medical Dermatology Society’s educational mission and highlights its unique focus. We are particularly excited to honor the recipient of our MDS 2023 Lifetime Achievement Award, Dr. Andrew G. Franks, Jr, a renowned dermatologist-rheumatologist, who is a master clinician and mentor who has inspired so many of us to pursue careers in complex medical dermatology and rheumatology-dermatology. He is a giant in the field and most deserving of this tremendous recognition.

In addition to our educational mission, we are increasingly bolstering efforts to support our research mission to advance the field of medical dermatology. This includes supporting and developing an ever-growing community of medical dermatologists, including through support for fellowships, mentoring opportunities and inter-institutional collaborations.

The Medical Dermatology Society’s core value continues to be building a strong community, providing a platform for important discussions on complex medical dermatology, offering training opportunities and fostering camaraderie among relevant stakeholders in our area of the field.

We are tremendously proud of the work that our society does, and we would like to thank our members and supporters for their dedication and commitment to the field of medical dermatology. We look forward to continuing our efforts to support and advance the field, and we encourage all our members to continue to be active and engaged in our society.

Sincerely,

Joseph F. Merola, MD, MMSc
President, Medical Dermatology Society
Associate Professor, Harvard Medical School
Vice Chair of Clinical Trials and Innovation
Depts of Dermatology and Medicine, Division of Rheumatology
Brigham and Women’s Hospital, Boston
HISTORY & MISSION

The MDS is made up of the thought leaders in clinical dermatology and the teachers of the next generation of practicing dermatologists. The MDS mission is to improve the care of patients whose skin diseases or therapies have substantial systemic consequences; foster research in medical dermatology and assure medical dermatology expertise in community and academic settings.

Members of the MDS represent the heart and soul of our specialty: Medical Dermatology. Founded in 1994, our members include Academicians, Private Practitioners and Resident Physicians who specialize in the care of patients with dermatologic diseases.

TARGET AUDIENCE AND SYMPOSIUM DESCRIPTION AND LEARNING OBJECTIVES

This course is designed for physicians in the following specialties: Dermatology, Internal Medicine and Dermatopathology.

Session will encourage all participants of this activity to implement some of the new information and/or techniques into their practice. Encourage participants to change as a result of attending this activity.

In this educational program, we will address the following practice base challenges and problems:

- Evidence and expert based treatment dilemmas for complex medical dermatology cases.
- Evidence based treatments for cutaneous malignancies and their associated adverse reactions.
- Evidence based treatments for emerging infections in hospitalized patients.
- Expert based discussion of clinical cases with high teaching value.

Demonstrate knowledge about established and evolving biomedical, clinical and cognate sciences and their application in patient care. Investigate and evaluate patient care practices, appraise and assimilate scientific evidence and improve practice of medicine.

Identify errors and hazards in care; understand and implement basic safety design principles; continually understand and measure quality of care in terms of structure, process and outcomes in relation to patient and community needs; design and test interventions to change processes and systems of care with the objective of improving quality.

Communicate, manage knowledge, mitigate error, and support decision making using information technology.

This activity will provide educational content aimed at closing the defined gap to result in improved knowledge, competence, and/or performance, which could result in improved patient outcomes.
MEDICAL DERMATOLOGY SOCIETY
2022-2023 BOARD AND COMMITTEE MEMBERS

OFFICERS

JOSEPH F. MEROLA, MD, MMSC
President
2022-2024
Brigham and Women’s Hospital;
Harvard Medical School

ART SAAVEDRA, MD, PHD, MBA
President Elect
2022-2024
University of Virginia School of

Dr. Franks holds permanent American Board Certification in Dermatology, Rheumatology, and Internal Medicine. He focused on autoimmune skin disease after completing his residency and fellowships at Columbia-Presbyterian Medical Center in NYC, emphasizing lupus, scleroderma, morphea, dermatomyositis, and Raynaud’s. He is widely regarded as a leading expert by his peers and has extensively published scientific articles and textbook chapters and lectured widely throughout his career. Dr. Franks is currently a Clinical Professor of Dermatology & Medicine (Rheumatology) and has been the Director of the Skin Lupus & Autoimmune Connective Tissue Disease Section at New York University School of Medicine from 1978 to 2021 at which time he was named Emeritus Director. As of January 1, 2023, he will have completed over 45 years of mentorship and teaching other dermatologists, rheumatologists, residents, fellows, and students. Dr. Franks has received numerous honors, including the NYU Alpha Omega Alpha Distinguished Clinical Teaching Award, and the NYU Lifetime Achievement Award, and is an invited member of the American Dermatologic Association and The New York Dermatologic Society. For over 25 years he has been listed in Castle Connolly’s Best Doctors in America. He is a Fellow of the American College of Physicians, the American College of Rheumatology, and the American Academy of Dermatology. He is also a Founding Fellow of the American Rheumatism Association and a Founding Member of the Rheumatologic Dermatology Society.

The CARLA SPARKLER SCHOLARSHIP, a new funding initiative as part of our Research Awards Program, the first program of its kind dedicated exclusively to funding young investigators with their medical dermatology research.

Carla Sparkler is a medical professional dedicated to the advancement of science and helping youth attain their dreams and further their medical professions. She believes in mentoring young people and helping them grow and become leaders and managers.

She leads by example and loves helping people who work for her become better people by providing active help and support. She is one of the hardest workers you will ever meet and will challenge you to think critically, provide solid arguments, and support a common goal of constant growth.
At Incyte, we’re committed to improving patients’ lives through meaningful science. That’s why we’re researching and developing innovative solutions for a number of dermatologic conditions, including atopic dermatitis and vitiligo.

Learn more at Incyte.com/derm.
Since its founding in 1874 as the nation’s first department of dermatology, Penn Dermatology has provided groundbreaking clinical care, innovative research, and outstanding educational programs.

Penn Dermatology maintains a high volume inpatient consult service at our flagship hospital, a state-of-the-art facility which opened in 2021. In our adjacent, newly expanded outpatient site, we have subspecialty clinics in autoimmune skin diseases, graft-versus-host disease, cutaneous toxicities of chemotherapy, neutrophilic dermatoses, lymphoma, melanoma, complex psoriasis, sarcoidosis, hidradenitis, vasculitis, and more. We are actively engaged in clinical and translational research studies in these areas, including sponsored multi-center trials and investigator-initiated research.

Penn Dermatology provides top educational opportunities and is committed to training the next generation of leaders in medical dermatology, offering a combined internal medicine/dermatology training program and opportunities for post-residency fellowships focused on complex medical dermatology and/or autoimmune skin disease.

For more information on Penn Dermatology Educational Programs, please contact Barbara Lang at 215-662-7883 or barbara.lang@pennmedicine.upenn.edu. For more information on open faculty positions at Penn Dermatology, please visit https://dermatology.upenn.edu/recruiting.

Penn Dermatology thanks the MDS for their partnership and support throughout the years.

Congratulations to Dr. Andrew Franks on receiving the 2023 MDS Lifetime Achievement Award!

Congratulations to Andy Franks, Jr. on receiving the MDS 2023 Lifetime Achievement Award

From your many colleagues in the Ronald O. Perelman Department of Dermatology at NYU Grossman School of Medicine.
The Medical Dermatology Society is partnering with Terrapass, Inc. for the second annual MDS Carbon Footprint Program. This program will enable attendees to reduce their carbon footprint from travel to the annual meeting. A $10 contribution will offset 1,000lbs of carbon dioxide equivalent emissions (approximate emissions from a medium-distance round trip flight).

To purchase carbon offsets, scan the QR code.

The Harvard Combined Dermatology Residency Training Program and the Brigham and Women’s Hospital Department of Medicine would like to thank the Medical Dermatology Society for supporting the careers of our faculty and residents.
We champion meaningful innovation within medical dermatology.

At Arcutis, that means focusing on unmet needs in the treatment of immune-mediated skin diseases. With deep medical dermatology development expertise and a unique product development platform, we’re committed to meaningful advances—innovation that solves the most persistent challenges of patients and their families.

UCSF IS PROUD TO SUPPORT
THE MEDICAL DERMATOLOGY SOCIETY

WORLD-RENNOWNED DERMATOLOGY EXPERTISE AT
UCSF DERMATOLOGY WE PROVIDE COMPREHENSIVE,
PERSONALIZED, INNOVATIVE TREATMENT

Backed by outstanding clinical expertise, education, training and research. World leaders in the care of all patients with skin disease, we’re the major dermatology referral center for Northern California. At our Mount Zion, Parnassus, Berkeley and Benioff Children’s Hospitals, we offer a wide range of specialty services in adult and pediatric medical, surgical and cosmetic care.

The Medical Dermatology Division features a premiere inpatient consultative dermatology service and numerous specialty clinics including hospital discharge, autoimmune, hidradenitis suppurativa, cutaneous lymphoma, psoriasis, contact dermatitis, and skin of color clinics. The Dermatologic Surgery and Laser Center, continually at the forefront of skin cancer treatment, has pioneered techniques still used worldwide. Our team excels at Mohs micrographic surgery, a specialized approach with the best cure rates and reconstructive results.

The Pediatric Dermatology Clinic, considered the gold standard in its field, is committed to improving the lives of children with every type of skin condition, offering state-of-the-art treatment for disfiguring lesions. UCSF’s Melanoma Center has transformed the way experts understand the condition, with discovery of important genetic mutations and molecular-based diagnostic tests. Our collection of tissue and data – one of the largest in the world – has been invaluable for studying melanoma’s progression and effectiveness of different therapies.
