University of Iowa Health Care

The University of Iowa Department of Dermatology, part of University of Iowa Carver College of Medicine, is seeking to hire medical dermatologists. We are accepting applications for a faculty position at the rank of assistant professor, associate professor, or professor (clinical or tenure track). The successful candidate will join a team of 14 faculty members, 15 residents, 1 fellow and 4 advanced practice providers.

Prospective candidates are invited to send a letter of interest and a CV to:

Janet A. Fairley, MD, FAAD
Professor and Chair
Department of Dermatology
janet-fairley@uiowa.edu

To learn more about the University of Iowa Department of Dermatology, visit:

medicine.uiowa.edu/dermatology

Position Offerings

- Protected time available for scholarly activities
- Start-up support and laboratory space for candidates interested in research
- Competitive salary and incentive program with a comprehensive benefit plan
- Opportunity to train medical students and residents
- Opportunity to work at Iowa's only comprehensive academic medical center, named the No. 1 health care employer and the No. 7 employer overall by Forbes magazine in 2016
- Opportunity to practice at main campus clinics or in private practice setting in Cedar Rapids, Iowa.

Living in Iowa City

The candidate will enjoy practicing in a Midwestern college city featuring:

- Outstanding public and private schools
- Low cost of living
- One of the safest and best-educated communities in the country
- A vibrant community which includes Hancher Auditorium, the Iowa Writer's Workshop, NCAA Division I sporting events, eclectic restaurants, and the cultural amenities of a diverse, cosmopolitan area without the high cost of living, crime, and traffic of a huge city.
Dear Members:

On behalf of the Medical Dermatology Society (MDS) Board of Directors, I would like to welcome you to the 2018 MDS Annual Meeting. It is an exciting time for the MDS; we continue to grow and remain ever adaptable, motivated, and responsive to addressing the needs of our patients and to growing the field of medical dermatology. The MDS is committed to sharing knowledge, facilitating collaborative opportunities, and supporting the development of inspired dermatologists who will advance our specialty.

As in previous years, the MDS created a program that is both innovative and practical. It focuses on issues that physicians will encounter when diagnosing or treating patients with complex medical dermatologic problems in the outpatient and inpatient setting while highlighting the advancements in our field’s evolving issues. So many of our patients suffer from itch, either intrinsically or as a function of their underlying cutaneous issue. Our Key Note speakers, Drs. Timothy Berger and Brian Kim, will update our understanding of the pathophysiology of itch and provide an effective clinical framework for assessing and successfully treating patients with this vexing symptom. Similarly, immunosuppressive therapies are the mainstay of our management of most dermatoses. Dr. Nicole Fett will discuss the important considerations in decision-making and surveillance of patients treated with these medications. Dr. Michael Rosenblum will help us understand and appreciate the role of regulatory T cells in the pathogenesis of the immune reactions we regularly encounter in skin disease. We are grateful that Drs. Janet Fairley and Russell Hall, our Past-President and 2017 Lifetime Achievement Award Recipient, will be sharing their rich and invaluable expertise in the Clinical Pearls section of our meeting. Finally, we look forward to celebrating the accomplishments and contributions of Dr. Warren Heymann, this year’s very deserving Lifetime Achievement Award Recipient. I would like to thank the members of the Board and MDS Committees who have worked throughout the year to ensure a quality meeting. As always, we applaud Debbie Kovacs for her tireless support of our organization every day.

Thank you for attending the MDS Annual Meeting and bringing your expertise and passion to our gathering. As leaders in the field of medical dermatology, you have the vision, knowledge, and drive to propel our mission ahead. You are truly our greatest asset and we could not accomplish what we do without your support. If you have any questions regarding the upcoming meeting or other MDS activities, please do not hesitate to reach out to me directly or to our administrative office. Welcome to San Diego and the 2018 Annual Meeting!

Sincerely,

Daniela Kroshinsky, MD, MPH
President, Medical Dermatology Society
HISTORY & MISSION

The Medical Dermatology Society (MDS) is made up of the thought leaders in clinical dermatology and the teachers of the next generation of practicing dermatologists. The MDS mission is to improve the care of patients whose skin diseases or therapies have substantial systemic consequences; foster research in medical dermatology and assure medical dermatology expertise in community and academic settings.

Members of the MDS represent the heart and soul of our specialty: Medical Dermatology. Founded in 1994, our members include Academicians, Private Practitioners and Resident Physicians who specialize in the care of patients with dermatologic diseases.

TARGET AUDIENCE AND SYMPOSIUM

This course is designed for physicians in the following specialties: Dermatology, Internal Medicine and Dermatopathology. Sessions will encourage all participants of this activity to implement some of the new information and/or techniques into their practice, as well as encourage participants to change as a result of attending this activity.

In this educational program, we will address the following practice base challenges and problems:

- Evidence and expert based treatment dilemmas for complex medical dermatology cases;
- Evidence based treatments for cutaneous malignancies and their associated adverse reactions;
- Evidence based treatments for emerging infections in hospitalized patients;
- Expert based discussion of clinical cases with high teaching value.

LEARNING OBJECTIVES

Demonstrate knowledge about established and evolving biomedical, clinical and cognate sciences and their application in patient care. Investigate and evaluate patient care practices, appraise and assimilate scientific evidence and improve practice of medicine.

Identify errors and hazards in care; understand and implement basic safety design principles; continually understand and measure quality of care in terms of structure, process and outcomes in relation to patient and community needs; design and test interventions to change processes and systems of care with the objective of improving quality.

Communicate, manage knowledge, mitigate error, and support decision making using information technology.

This activity will provide educational content aimed at closing the defined gap to result in improved knowledge, competence, and/or performance, which could result in improved patient outcomes.

UNIVERSITY OF IOWA JOINT PROVIDER STATEMENT

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of the University of Iowa Carver College of Medicine and the Medical Dermatology Society. The Carver College of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

The University of Iowa Carver College of Medicine designates this live activity for a maximum of 4.0 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Massachusetts General Hospital, Harvard Medical School
12:50-1:00 PM  INTRODUCTION AND WELCOME
Daniela Kroshinsky, MD, MPH
President, Medical Dermatology Society
Massachusetts General Hospital, Harvard Medical School

1:00-2:00 PM  ABSTRACT PRESENTATIONS
Presiding: Milan Anadkat, MD, Washington University School of Medicine

1:00-1:15 PM  Ruxolinitib as salvage therapy for chronic graft-versus host disease
Michael Hernandez-Henderson, Meharry Medical College

1:15-1:30 PM  Citizen Pscientist: A novel digital platform to enhance patient-centered psoriasis and psoriatic arthritis research by empowering patients as data analysts and research partners
Isabelle Sanchez, MPH, University of California, San Francisco

1:30-1:45 PM  Incidence of pneumocystosis among patients receiving glucocorticoid and immunosuppressant therapy
Sergey Rekhtman, MD, Zucker School of Medicine at Hofstra/Northwell

1:45-2:00 PM  Identification of atorvastatin for moderate to severe hidradenitis through drug repositioning using public gene expression dataset
Karen Kuo, MD, Stanford University School of Medicine

2:00-2:50 PM  KEY CONSIDERATIONS IN MANAGEMENT WITH IMMUNOSUPPRESSIVES
Presiding: Amit Garg, MD, Zucker School of Medicine at Hofstra/Northwell

Presenting: Nicole Fett, MD, Oregon Health and Science University

2:50-3:30 PM  TRANSLATING INNOVATION TO PATIENT CARE: FROM BENCH TO BEDSIDE
Understanding how regulatory T cells (Tregs) control immune responses in tissues;
Understanding the ‘alternative’ functions of Tregs in tissues
Presiding: Kanade Shinkai, MD, PhD, University of California, San Francisco

Presenter: Michael Rosenblum, MD, University of California, San Francisco

As of January 16, 2018
St. Joseph Mercy Livingston is currently accepting applications for the Medical Dermatology fellowship for July 2018. The fellowship is a one to two year position in complex medical dermatology and is physically located in the Ann Arbor area. Fellows will learn in a practice dedicated to complex medical skin diseases, such as autoimmune bullous diseases, connective tissue diseases, psoriasis, and atopic dermatitis. Fellows will learn systematic medication management techniques and participate as subinvestigator in ongoing clinical research trials of new dermatologic therapies.

Applicants must complete an ACGME accredited dermatology residency program by June 2018 and be eligible for full Michigan medical licensure. If interested, please send CV to fivensondermatology@comcast.net.

For more information, visit stjoeshealth.org/gme.
Since its founding in 1874 as the nation’s first department of dermatology, Penn Dermatology remains at the forefront of academic medicine. Penn Dermatology provides groundbreaking clinical care, conducts innovative research and offers outstanding educational programs. Providing care for medically complex dermatology patients, Penn Dermatology maintains an active inpatient consult service with subspecialty clinics in autoimmune skin diseases, graft versus host disease, lymphoma, melanoma, psoriasis, sarcoidosis and vasculitis, performing clinical and translational studies in these areas. In addition, Penn Dermatology provides top educational opportunities and remains committed to training the next generation of medical dermatologists, offering a combined internal medicine/dermatology training program and opportunities for post-residency fellowships focused on complex medical dermatology and/or autoimmune skin disease. For more information on Penn Dermatology Educational Programs, please contact Mary Beth Forte at 215.615.0585 or marybeth.forte@uphs.upenn.edu.

**Penn Dermatology thanks MDS for their partnership and support throughout the years.**

Congratulations to Dr. Warren Heymann on receiving the MDS Lifetime Achievement Award!
Work Hard, Play Hard — Join us in Portland!

We are looking for a CTCL expert to join us. Contact: glazierd@ohsu.edu
AT UCSF DERMATOLOGY WE PROVIDE COMPREHENSIVE, PERSONALIZED, INNOVATIVE TREATMENT backed by outstanding clinical expertise, education, training and research. World leaders in the care of patients with skin disease, we’re the major dermatology referral center for Northern California. On our Mount Zion and our Mission Bay campuses, we offer a wide range of specialty services in adult and pediatric medical, surgical and cosmetic care.

We at the Department of Dermatology would like to announce its Complex Medical Dermatology Fellowship. This year-long fellowship emphasizes the development of advanced clinical skills in inpatient and outpatient complex medical dermatology in a highly mentored environment. During this year, the participant will work in the complex medical dermatology resident continuity clinic, autoimmunity clinic, complex medical dermatology faculty practices, and the inpatient wards. The participant will also have protected academic time for scientific development in line with his/her own interests. The year is divided between outpatient clinics focused on complex medical dermatology and inpatient wards. The clinical experience provides sufficient exposure so the participant will be able to artfully manage patients with the full spectrum of severe dermatoses. Specific goals include the acquisition of expertise in 1) caring for outpatients with complex medical conditions such as autoimmune blistering diseases, rheumatologic/dermatologic diseases, severe eczema, severe psoriasis, cutaneous diseases with systemic manifestations, 2) using systemic immunosuppressants and biologics to treat complex medical dermatologic conditions, 3) the evaluation and management of skin disorders in critically ill hospitalized patients, and 4) the management of hospitalized patients with severe dermatologic diseases. In addition to clinical training, the year provides protected time for career development activities, including finding and developing a niche within medical dermatology. It is expected that the participant will conduct research and complete publications in his/her area of interest.

The ideal participant is someone planning or just beginning a career in academic medical dermatology.

Anakinra for Inflammatory Pustular Dermatoses

The National Institutes of Health (NIH) is investigating the safety and efficacy of anakinra for the treatment of inflammatory pustular dermatoses. Anakinra is a recombinant interleukin 1 receptor antagonist administered as a daily injection.

**Eligible patients must be:**
- Adults diagnosed with inflammatory pustular dermatoses including, but not limited to, generalized pustular psoriasis, palmoplantar pustulosis, acrodermatitis continua of Hallopeau and subcorneal pustular dermatosis.
- Able to travel to the NIH once a month for 4 months.

**Study participants may receive:**
- A physical exam of the skin, joints, eyes, and heart; blood work, urine analysis, skin biopsy, and imaging studies.

Principal Investigator: Edward Cowen, M.D., M.H.Sc.

---

Topical Ruxolitinib for Cutaneous cGVHD

NIH researchers are testing the safety and effectiveness of ruxolitinib cream in patients with cutaneous, non-sclerotic, chronic graft versus host disease (cGVHD).

**Eligible patients must be:**
- 12 years or older with non-sclerotic cGVHD of the skin.
- Able to travel to the NIH for 3-4 visits during the 6 week study.

**Study participants may receive:**
- A physical exam, skin biopsy, and laboratory work.

NIH study 18-AR-0035
